Slow speed when connected to router via 20m fiber optic cable

Overview

For gigabit speeds, you'll need Ethernet cables that are Cat 6 or higher. Latency refers to the time it takes for data to travel from your device to its destination and back. With upload and download speeds that often exceed 1,000 Megabits per second (Mbps), fiber optic internet has the capacity to provide a seamless online experience while powering all of your connected devices at once. I was expecting dl speeds of 900+ on wired connection and 600+ on wifi when close to router, what I am getting is 100 (dl) on wired and max of 350mb on wifi when sitting on top of the router, other rooms in my apartment are getting 50-200~ on the wifi network. Fiber optic networks are celebrated for their speed and reliability, but even the best systems can encounter problems. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. [Is My Wi-Fi Slow Because of My Router or My Internet Provider?](#)

Your Wi-Fi may be slow due to a number of reasons, including issues with your internet provider, your modem or ONT, your router, or the devices you use.
