Smart Kuwait Electricity

Overview

The Ministry of Electricity, Water and Renewable Energy is moving ahead with plans to complete the installation of smart electricity meters across all sector facilities by the end of 2026, as part of efforts to modernize the measurement system and enhance the efficiency of. As Kuwait advances towards its Vision 2035 goals, energy efficiency and sustainability have become national priorities. Central to this transformation is the adoption of smart metering technology — a practical, scalable solution that empowers consumers, businesses, and utilities to manage energy. Kuwait telco stc is to supply 500,000 smart electricity meters to the ministry of electricity, water and 73 (MEW) for the second phase rollout.
