Specifications of Armenian Stainless Steel Distribution Boxes

Overview

This document provides specifications for various distribution boxes including dimensions, mounting sizes, and number of ways. Grade 316 is the standard molybdenum-bearing grade, second in importance to 304 amongst the austenitic stainless steels. The molybdenum gives 316 better overall corrosion resistant properties than Grade 304, particularly higher resistance to pitting and crevice corrosion in chloride environments. Since 2013, Mikmetal CJSC is the only representative of the ASCE Group company for the.
