Steel structure cable tray of Jiefang Bridge

Steel structure cable tray of Jiefang Bridge

Yachihe Bridge, China: engineering the world's longest cable-stayed

Yachihe Bridge in China is the longest steel-truss, cable-stayed bridge in the world and the tenth longest overall. Completed in 2016, its 800 m main span carries the new Guiyang-Qianxi

Structural Analysis of the Sutong Bridge

The total length of the cable-stayed portion of this project is 2088 m with a 1088 m main span. The height of the pylons is about 300 m. When completed it will be the longest cable-stayed bridge in the

Lahore Fabrication & Engineering Industries - Pakistan I

We are leading manufacturer of Guardrail, Cable Management System, Fencing, Steel Gantries, Electric & Communication Poles, Road Crossing Bridges and

Analysis on the Structural Type of Large-span Steel Truss Bridge Spe

ral-type design of a large-span steel truss bridge specially used for cables has been performed.

The numerical results indicate that the stayed-cable bridge with steel truss beam and concrete main

Tianjin bridge rings in momentous anniversary

The Jiefang Bridge, literally translated as Liberation Bridge, is a steel-structured movable bridge unveiled on July 1 to celebrate the 98-year-anniversary

Collections & Exhibitions

Jiefang (Liberation) Bridge is a two-leaf vertical-open steel bridge with a length of 98 meters and deck width of 19.5 meters, located on the Haihe River between Tianjin Railway Station (East Station) and

Jiefang Bridge in Tianjin

Jiefang Bridge, also known as the Wan Guo Bridge, was constructed in 1927 and stands as one of the iconic structures in Tianjin. It is a unique

Jiefang Bridge(A river-crossing passage in Tianjin

Jiefang Bridge, originally named "International Bridge", is a river-crossing structure connecting Hebei District and Heping District in Tianjin, China. It spans the Haihe River waterway and is China's only

Study on the History and Present Situation of Cable

Abstract With the improvement of force mode, the development of material characteristics and technologies, the Cable-stayed Bridge structures are

Cable Tray Manufacturer and Accessories in Pakistan

It has been designed in such an efficient way that the cable can enter or exit at

Review of design and innovative construction of steel truss cable

This paper provides a review of their development, the structural configurations used, the mechanical characteristics of decks, pylons and cables, and the various innovative construction

Historic Tianjin bridge keeps momentum with maintenance

The steel-structured movable bridge, a historical icon in Tianjin, was built in 1927 and recently renovated. It only unfolds its steel structure during important

Tianjin Jiefang Bridge, there are big ships passing under

"A big ship passing under the Wanguo Bridge" was once a scene of Haihe River, because the Jiefang Bridge is an all- steel bridge that can be opened. When the

Focus creates quality products

Study on the History and Present Situation of Cable

In this paper, the history of ancient Cable-stayed Bridges is firstly introduced. Then, several Cable-stayed Bridges which have great influence are

Cable Tray Manufacturer

Wire mesh cable tray is fabricated with high quality galvanized steel wire or stainless steel wire. The lightweight wire mesh tray is the flexible

World's Longest Cable-stayed Bridge Opens in China

China's recently inaugurated Chantai Yangtze River Bridge, with a 1,208-m-long main span that secures it the title of world's longest cable-stayed

Jiefang Bridge

Jiefang Bridge is located on the Haihe River between Tianjin railway station (East Station) and Jiefang North Road. It is an all steel openable bridge, built in 1927.

The World's Top 10 Longest Cable-Stayed Bridges

The 1,104-meter-long main span of the Russky Island cable-stayed bridge will set a new length record when that Bosphorus Strait crossing opens next year.

Wire Mesh Cable Tray

China Wire Mesh Cable Tray catalog of Steel and Stainless Steel Mesh Bridges Provide Reliable Cable Support, High Quality Wire Mesh Bridge Equipment Stainless Steel Wire Basket Cable Tray provided

Structural Steel Cable Tray for Stable Bridge Engineering Wiring

Our main products include cable trays, seismic supports, C-channel steel, and cable tray accessories. We have more than 30 production lines and can customize production according to your requirements.

Jiefang Bridge Map

Jiefang Bridge is a bridge in Guangzhou, China. The bridge connects the Haizhu District with the Yuexiu District, and is one of nine bridges connecting Haizhu with downtown Guangzhou and the business
