Swiss Passive Optical Network 10G

Overview

Unlike traditional GPON (Gigabit Passive Optical Network) solutions, XGS-PON delivers symmetrical speeds of up to 10 Gbps both upstream and downstream. This is the ITU-T 's next-generation standard following on from GPON or gigabit-capable PON. Characterized by its simple architecture, low equipment requirements, and energy. Cisco's family of 10-Gbps symmetrical passive optical network (XGS-PON) Optical Network Terminals (ONTs) delivers flexible, high-performance broadband connectivity for a wide range of fiber-to-the-premises use cases, including residential spaces, Multidwelling Units (MDUs), Small Office/Home Office.
