The red light splitter is very weak

Overview

If the signal strength is low or if there is no signal at all, the splitter may have developed a fault. In some cases, the issue may also occur if the input signal is weak or there are other problems with the cable line. Here are a few typical problems you may encounter with HDMI splitters, along with their potential fixes: 1. The problem is that: I connect the input cable to my cpu and the dc cable; the red light and the main green light are turned on, then I plug the first outway cable, which is a vga to hdmi adapter for my main.
