The router stopped working after the fiber optic connection was replaced

Overview

Many fiber internet problems come from dirty connectors or loose plugs, not major faults. Power cycling or restarting your ONT (Optical Network Terminal) often resolves simple troubleshooting internet issues. Along with this overhaul, they gave me a new modem (because the old one was for coaxial). This morning my ISP upgraded my Internet connection from a standard coaxial cable and Cisco modem to a fiber optic cable and Hitron modem Model Name NOVA-2004. First, check the basics—look for power issues on your optical network terminal and inspect all cables for visible damage.

The router stopped working after the fiber optic connection was rep

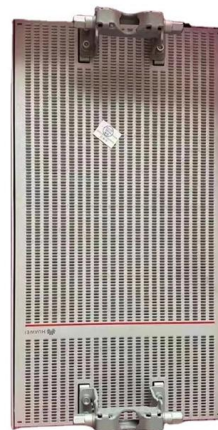

Keeping Networks Up: A Guide to Troubleshooting Fiber Optics

How to Repair Fiber Optic Cable: Top 5 Easy Steps (2024)

Learn how to repair fiber optic cable with our step-by-step guide. Discover essential tools, splicing techniques, and troubleshooting tips.

Cannot access router after upgrading internet with new fiber

The router automatically changed its IP address to 10.0.0.1, as well as all the IP addresses that connect to it. This explains why I couldn't find anything on the network.

At first I thought it was a local IP conflict (which turned out to be one of the problems) and I swiftly fixed that by giving the ISP-provided router "192.168.3.1" and my personal router
