The switch cannot connect to the core

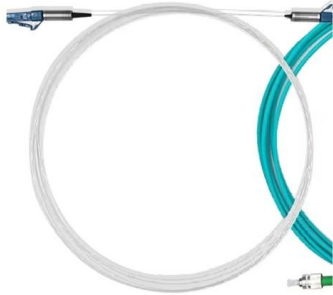

Overview

The first thing you need to make sure is that the links on both sides, between the client and the server, are configured as trunks and that their trunking types match. A device can be pinged from core switch (router) but not the switch it's plugged into. I'm just an apprentice and I don't know what I've done wrong! We have a pair of Dell N3224P-ON switches and today's morning my colleague gave me a task and instructions to. I have an issue in another city watch is I can't ping to the switch it said "time out" BUT I can ping the core and after I ping the core I can ping the switch!! It's weird Hoi there, this is not a very helpful problem description.

The switch cannot connect to the core

What is a Core Switch , Functions and Difference over Normal Switch

This is due to the core switch's connections with several aggregation switches. Another major difference is that the data from all the other levels including the distribution and access layers,

Cannot ping core switch from another switch
