There was a sudden electrical hum coming from the distribution box

Overview

If you notice a buzzing sound coming from your wires or outlets, contact an electrician. Some common reasons for electrical humming or buzzing noises include: If electrical wires are not properly secured or damaged, they can vibrate and emit a humming noise. This could be due to natural wear and tear, poor installation, or animals chewing on exposed wiring. A low, persistent humming noise is a low-frequency vibration caused by energy—electrical, mechanical, or hydraulic—encountering resistance or a loose connection. Understanding the source requires a systematic approach, as the sound often travels through the. If you do start to hear strange noises that sound like they may be coming from your electrical system, there may be cause for concern, but it's important that there are certain things you don't do yourself and leave to a professional.
