Tonga Optical Cable Laying

Overview

Tonga Cable System is a system connecting with, where it connects to other international networks. It has cable landing points at Sopusu, a suburb of Nuku'alofa in Tonga, and Suva, Fiji. A volcanic eruption in the South Pacific Ocean in January 2022 caused a tsunami and damaged an undersea fiber-optic telecommunication cable that connects Tonga, a Polynesian archipelago, to the rest of the world. The cable cost was around T\$36 million and was financed through grants from the World Bank Group and the Asian Development Bank. Not a metro area, not a data center cluster — a sovereign nation of roughly 105,000 people, spread across an archipelago of more than 150 islands in the South Pacific, whose international connectivity depends on a.
