

**Adam Tas Corridor Energy**

# **UL Standard for Metal Distribution Box Enclosures**

## Overview

---

UL standards for electrical enclosures are based primarily on UL 50E (Standard for Testing the Protection Grades of Enclosures for Electrical Equipment), which uses the IP code system to define the dust and water resistance of enclosures. Our involvement in the CB Scheme, an international system for mutual acceptance of test reports and certifications, helps provide cost- and time-savings for global market access. Third-party verified to UL 508A and UL 50 standards — ready for NEC-compliant installations across industrial, commercial, and utility applications. From UL type electrical boxes to UL junction boxes, Polycase's UL Listed enclosures also offer a wide range of sizes. Add to favorite Cancel Products Low Voltage Products and Systems Residential and Small Business Industrial Automation and Control Building Automation and Control MV Distribution and Grid Automation Critical Power, Cooling and Racks Solar & Energy Storage Master Ranges Tools and Resources APC Square. We can fabricate the following UL electric enclosure types; 1, 3R, 4, 4X, 12, & 12K.
