Waterproofing of outdoor escalator electrical distribution boxes

Overview

Waterproof distribution box manufacturers tell you that the way to waterproof an outdoor distribution box is to first choose a distribution box made of waterproof material, seal the cable entry points, apply silicone sealant, install a weatherproof cover, use. Just the right materials, a thoughtful install, and the discipline to seal what needs sealing. Waterproofing of outdoor electrical boxes is critical to protecting electrical components from moisture and ensuring safety. However, the outdoor environment is complex and changeable, and extreme weather, sandstorms and other phenomena often occur, which requires metal distribution boxes to have good waterproof and dustproof performance to ensure the stable operation of the power system.
