# **What is Gysta fiber optic cable**

## Overview

---

GYTA fiber optic cable is a stranded loose tube outdoor cable widely used for overhead, duct, and even direct burial applications. It consists of 24 individual fibers that are protected by a durable and rugged outer jacket. Stranded Loose Tube Light-armored Cable (GYTS/GYTA) is a reliable and high-performance solution for fiber optic communication. Cable filling materials ensure high reliability, and APL makes the cable crush resistant and.
