What is a 155Mbps optical module

Overview

A 155M SFP is an optical SFP module designed to transmit data at a fixed rate of 155Mbps, primarily used in SDH STM-1 and SONET OC-3 networks. Despite the dominance of Gigabit and 10G optics, 155M SFP modules are still actively purchased today —not as legacy leftovers, but as deliberate, cost-efficient. Optcore's OSP155-3120xCR is a high-performance small form factor pluggable (SFP) transceiver module for duplex optical data communications such as Fast Ethernet and SDH/SONET OC-3/STM-1. The high-speed laser diode and photo diode are provided as a light source and a detector, respectively.
