What is a TL distribution box

Overview

Think of it like a main spot where connections are set up for easy communication. A Standard LT distribution box, as offered by Nakoda Products, efficiently divides an electrical power feed into subsidiary circuits, while providing a protective fuse or circuit breaker for each circuit in a common enclosure. 8-inch LCD screen (equipped with touch buttons), which can display the current, voltage, power and switch status of each output channel in real time. It also supports viewing device operation logs, device information, and temperature and humidity data. The CEP 8706TLCX Portable Power Distribution Center is a rugged, 6-outlet distribution box that provides the highest level of electrical safety for the user.

What is a TL distribution box
