Wires extending out of the distribution box into the circuit

Overview

Wiring Direction: Wiring between the main circuit breaker and each branch circuit breaker in the box generally goes on the left, and the wiring out of the distribution box generally goes on the right. A 3 phase db box, also known as a 3 phase distribution board or electrical panel, is an important component of electrical systems in commercial and industrial buildings. It serves as a central hub for distributing electricity throughout a building, ensuring that power is delivered safely and efficiently to all the required locations. Every junction box cover must be accessible without disassembling any part of the house.
