Wiring price for primary distribution box

Overview

A typical home replacement for a 100–125A indoor panel runs about \$1,200–\$2,500 in parts and labor; a 200A outdoor upgrade with new meter socket can reach \$3,000–\$6,000. Assumptions: standard conduit routing, existing wiring reachable within 10–30 feet, and a single dwelling. Understanding distribution box cost involves examining the comprehensive investment required for electrical distribution systems that serve as crucial infrastructure components in residential, commercial, and industrial settings. Primary distribution systems consist of feeders that deliver power from distribution substations to distribution transformers. In May 2026 the estimated national average cost to Install Electrical Wiring starts at \$302 - \$365 per wiring run. Use our Cost Calculator for cost estimate examples customized to the location, size and options of your project. Assessment of electricity demand Firstly, understand the required number of circuits and voltage ratings, and then select the appropriate type of distribution box.
